Creating a Strategy

Let us now see how to proceed to the realization of a Strategy analyzing all the steps to proceed correctly.

Video Strategy

| 4 | 24/03/2016 | Strategy - How to import on Iceberg an existing strategy | 5:59 |
| 4 | 24/03/2016 | Strategy - How to change filled price of a strategy | 2:22 |
| 4 | 20/04/2016 | Strategy - How to import positions of the broker | 2:51 |
| 4 | 22/04/2016 | Strategy - From setting of the strategy to Plan B | 18:45 |
| 4 | 20/04/2016 | Strategy - Management of Dividends | 5:40 |

Click here to watch other Iceberg Video

1. Start Iceberg

Once verified that the options and futures are properly encoded, you switch to start Iceberg, an app of beeTrader®. It is possible to start Iceberg by the menu beeApps and the Welcome page of beeTrader® both. If you can't click the button check the authorizations on area user of PlayOptions.it site.

2. Click New Strategy

3. Select Underlying

In "General" you can see a large part of the necessary information.

The first thing to do is to choose the underlying on which you want to build your strategy, then in Underlying of Strategy menu, click Select Underlying

Subsequently it is shown a window to select the underlying in which appear only the securities linked to the options, so if the underlying does not appear in the list you have to connect the Options Chain to it, see Symbol Manager for the procedure. To facilitate the search of the underlying in this window there is a filtering system for each column. In the example the underlying assets are grouped by exchange simply dragging the column header of Markets on the line above.

4.B Failure download Option Chain - No options available

Can take place, due to momentary connection problems to the broker's platform, the Options Chain is not downloaded. In this case Iceberg shows the message "No options available" message. You need click the right mouse button in option chain section and select Reload / Retry. It will then be made a new attempt to download the Options Chain from the broker.

5. Study Strategy

Well, now with the underlying and Options Chain we have to study the strategy to implement. Through the menu that appears with the right mouse button you can choose the strike and expires. To deepen the Options Chain functions, click here.

Let's say you want to make a condor, then you sell a put a call 3050 3150 and buy the put and call 3000 3200. Adding or removing options contracts in Options Chain the payoff changes accordingly. The operations are highlighted in blue in the Trades and in Legs , this indicates that the operations are still to be finalized in basketball. In Payoff the Breakeven Points are shown in red color. The standard deviation are shown in green color. This is a default configuration that the user can change at will, for more information on the functions of the Payoff Click here. All properties of the options readed in Legs and Trades are editable, for more information on the Legs Click here, and for more information on the Trades click here.

It is recommended to read the section of the manual about order execution in Paper Trading or Real

Check the options from Symbol Manager

If underlying desired is not available it must be coded in Symbol Manager with his options and futures.

Suppose as an example to create a strategy on Eni through WeBank.

Opening the Symbol Manager and Eni we can see that the check boxes "Add to the Underlying Futures" and "Add to Underlying Options" are already flagged, this means that the underlying Eni is configured. By clicking on the buttons "Generate Chain Futures" and "Generate Options Chain" in the corresponding tab you can verify that the settings are correct, indeed the chain request is made to the broker platform which must be open.

if this does not happen, and the underlying has options listed on the broker you should be able to encode it. On beeTrader® manual there is the procedure to encode symbols for each broker: Yahoo! Finance, Interactive Brokers - TWS, Iw Bank - Quick Trade & PEI, Webank - T3 Open 8.0.
