

Market Strategy

The Market Strategy shows a Payoff which represents the outlook of the market on the selected underlying. In order to create the market payoff, data history will be requested from Icerberg to the user's platform. The data will be sent to PlayOptions.it for the elaboration.

For the proper functioning of Market Strategy is necessary that the financial instrument is encoded in [Symbol Manager](#) Chain Option. The financial instruments with options are highlighted in blue. For the encoding procedure of the financial instruments in [beeTrader®](#) please refer to the manual [Symbol Manager](#) with the specific instruction for every broker.

Esempio

The button "Refresh" allows to update the Market Strategy. with new data, It is allowed to Refresh once an hour. By clicking "Refresh", whether an hour is not passed , a window with remaining time will appear.
