## **Plan Object**

A Plan consists of various objects that indicate the logical sequence and then how the sequence will be evaluated and executed. We see below what items make up a Plan and their properties.

#### Start

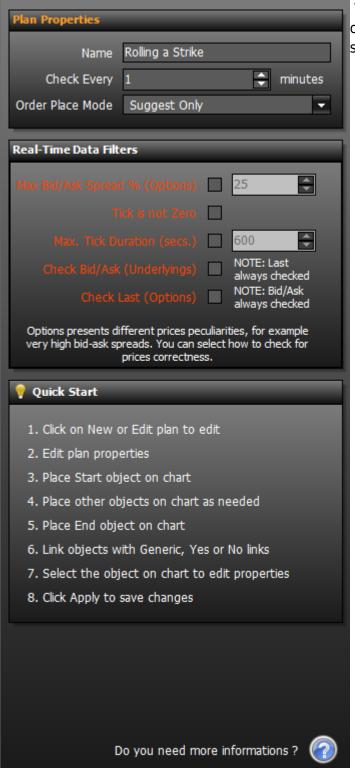

By clicking the button

Start you can enter the Start object

When Start object is selected, as well as the End object, it appears a sidebar with the general settings of the Plan.

- Name: name of the Plan;
- Check Every: You set how many minutes must elapse between a check of the plan and another;
- Order Place Mode: Here you choose how Iceberg must manage the delta hedging orders.

  Suggest Only: In case of a generation of an order Iceberg only show it on the "General" tab and

Last update: 2016/09/01 14:23

it must be finalized in Real Market or Paper Trading. Paper Trading (Automatic): in case of a generation of an order it is automatically put in Paper Trading. Real Market (Manual): In case of a generation of an order the corresponding book to trade it in real market will appear. Real Market (Automatic): In this case an order is automatically sent to the broker with the price type previously set;

- Max Bid/Ask Spread % (Options)
- Tick is not Zero
- Max Tick Interval (secs)
- Check Bid/Ask (Underlying)
- Check Last (Options)

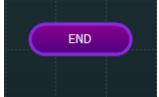

entered to complete a Plan.

You can only enter a Start object into the Plan, which must be concluded with an End object but you can enable more Plans at once.

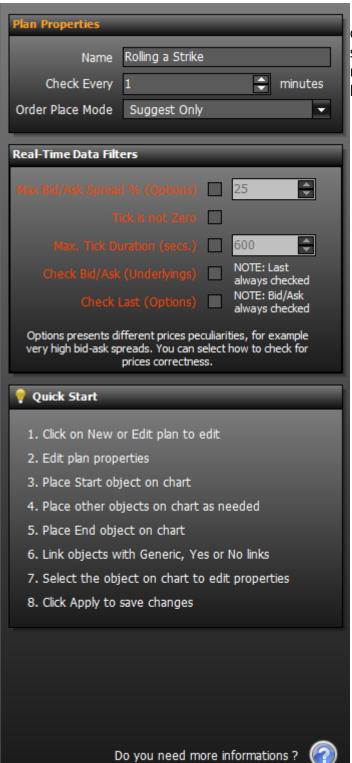

#### **End**

By clicking the button

you can enter the End object

which must be

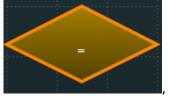

When Start object is selected, as well as the End object, it appears a sidebar with the general settings of the Plan where you have to set its name and how many minutes must elapse between a check of the plan and another.

## **Condition**

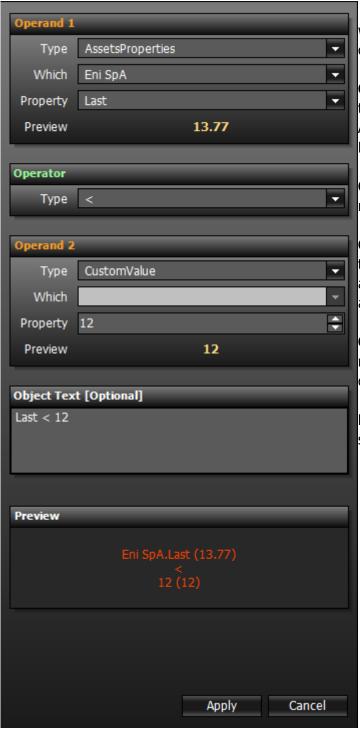

By clicking the button Condition it is possible to insert the object

which

contains the condition that will have to be verified. From a Condition object can exit a "Yes" link, which will be connected to the action to take if the condition is verified, or a "No" link, which will be connected to the action to take if the condition is not verified.

When "Condition" object is selected, a sidebar with the settings will appear. You have to complete the field.

**Operand 1:** you have to assign the first term of the comparison, It can be a property of an Asset, a property of a Strategy, a property of a Plan or a Custom value setted by the user;

**Operator:** You have to choose the mathematical operator;

**Operand 2:** you have to assign the second term of the comparison, It can be a property of an Asset, a property of a Strategy, a property of a Plan or a Custom value setted by the user;

**Object Text:** in this field you can assign a short note that will be displayed in the Plan within the object Condition;

**Preview:** it shows shows the preview of the selected condition.

In base al tipo di strumento selezionato in Operand 1 e Operand 2 alla voce Type, il sistema propone eventuali Which e le relative Property. Se per esempio viene selezionato il Type Asset il sistema propone tra i Which le gli Asset disponibili, quindi il sottostante, le legs o i futures. Una volta selezionato il Which voluto nelle Property il sistema propone l'elenco delle proprietà disponibili per quel particolare Which.

Туре	Which	Property
AssetsProperties	Legs of the Strategy	Proprietà della Legs della Strategy selezionata
StrategyProperties	-	Proprietà della Strategy
CustomValue	-	Valore impostato dall'Utente
