In this example, a Quick Alert was set on the Last price of the underlying in relation to the strategy's Downside Breakeven, when this condition will occur the user will be alerted by a message box and also an email that will be automatically sent to the mail address displayed on the settings window that is the same as the initial login.

You can choose from all the properties of the strategy and assets that compose it, in addition to the values chosen by the user.

## Template

You can use Quick Alert Templates that are already set:

- Net Result < -Max Profit: that is, the loss is greater than the maximum profit of the strategy;
- Net Result > Max Profit/2: that is, the current gain is greater than half the maximum profit of the strategy;
- Strike: any leg are in the strike, both OTM and ITM;
- Strategy BEPs: the underlying is in the BEP of strategy, both Upside and Downside;
- Options BEPs: when the underlying is in the BEP of an option.
