

Iceberg - Options Solutions

Iceberg is a new options software within beeTrader Trading Platform. Like an Iceberg it has many in depth features and for this reason it is usable by both newbie and professionalist.

Features:

- Automated trading in options;
- Test of the strategy in the future;
- Three-dimensional volatility surface;
- Comparison table with four strategy
- Portfolio with margins and correlation;
- Profit & loss calculated for every greek;
- Forecast tool in real-time;
- Payoff with greeks and standard deviations;
- Real Market and Paper trading;
- Market Maker engine;
- Book for Optionist with tick by tick graph;
- Implied Volatility index for every asset;
- ..and other 1000 function.

For the proper functioning of Market Strategy is necessary that the financial instrument is encoded in [Symbol Manager](#) Chain Option. The financial instruments with options are highlighted in blue. For the encoding procedure of the financial instruments in beeTrader® please refer to the manual [Symbol Manager](#) with the specific instruction for every broker
