

Strategy - What-If

In this section you have the opportunity to check what will happen to its strategy in the market conditions that you assume. Starting from the basic strategy, you can change the date, the price of the underlying and volatility and test up to four possible future moves.

The theoretical prices used in the What-If are calculated with the new Internal Market Maker Iceberg, prices do not move only according to the user's assumptions, but also with the volatility surface to which user wants to refer. Default is always used a flat volatility surface. To use a different volatility surface, it can be loaded as explained below.

The internal [Market Maker](#) acts in the same way the real [Market Maker](#) acts under the same market conditions

Video Tutorial

Click [here](#) to watch other [Video di Iceberg](#)

The menu

Strategy

	It open the submenu Strategy
	It create a new Strategy
	It open a previously saved strategy
	It saves the strategy currently in use.

What-If Scenario

- Underlying Price

- Price Change
- Volatility Change
- Analysis Date/Time
- Days from Today

Selection

 Strategy 1	It select the strategy 1, by this time all the operations will be performed on this strategy and on the cyan color payoff
 Strategy 2	It select the strategy 2, by this time all the operations will be performed on this strategy and on the magenta color payoff
 Strategy 3	It select the strategy 3, by this time all the operations will be performed on this strategy and on the yellow color payoff
 Strategy 4	It select the strategy 4, by this time all the operations will be performed on this strategy and on the orange color payoff

Actions

 Apply	it confirm transactions with the current settings. When the Apply button is clicked, the system saves the transactions in the window What-If History .For more information on window What-If History , click qui
 Clear Selected	It delete all orders of the selected strategy and return to the starting strategy
 Clear All	It delete all orders, practically it start a new What-If session
 What-If History	it open the window What-If History in which are stored all operations realized by What-If

Options Chain

 <p>Filter Expiries</p>	<p>It allows you to filter the deadlines visible on Chain Opzioni. For more on Chain Opzioni, click qui</p>
 <p>Filter Strikes</p>	<p>It allows you to filter the strike visible on Chain Opzioni. For more on Chain Opzioni, click qui</p>
 <p>Default Filters</p>	<p>It allows you to delete changes to the expiries filters and / or strikes and return to the default display</p>
 <p>Market Maker Surfaces</p>	<p>It open the submenu Market Maker Surfaces the tool that allows the processing of the volatility surface on which theoretical prices are calculated</p>
 <p>Edit/Acquire Surfaces</p>	<p>It start the window Market Maker Surfaces for the selected underlying and it acquire the current market volatility surface</p>
 <p>Open Surface</p>	<p>It starts the window Market Maker Surfaces for the selected underlying and it allows to use previously saved strategy</p>
 <p>Save Surface</p>	<p>It save te current surface for future use</p>

Payoff

 <p>Reset Zoom & Pan</p>	<p>it reset the zoom and then return to the original display</p>
 <p>Cross Hair</p>	<p>it enable or disable the Crosshair for Payoff</p>
 <p>Save as Image</p>	<p>it allows you to save the Payoff of Strategy currently in use in image format (*.png). The image will be saved to the Pictures folder of beeTrader, in the user's Documents</p>
 <p>Print</p>	<p>It allows you to print the Payoff of Strategy currently in use. Feature available on the PC in use if there is a printer</p>

Example of What-If

1. Suppose we have a strangle on FTSE MIB 40 Index with the underlying at 17000, therefore - 1 put 15000 e - 1 call 19000 on expiry 06/2016

2. Switching on What-If tab we can see that all properties (main strategy and the four possibilities of what-if, are equal). Next to it there is the panel that lets you to set the parameters like future underlying price to see what would happen to the strategy in those conditions

3. For example whether the price going to 19000 on 20/05/2016.

4. The put 15000 gain 762,50 € while the call 19000 loss 770,00€. At this point you can use the four strategies available to study whats you would do

The screenshot displays a comprehensive trading analysis tool. At the top, a summary table provides key metrics: Net Result (€ 66,93), At Now (€ 66,93), Realized (€ 0,00), Equity (€ 0,00), Net Result % (2.71%), Max Profit (€ 2.432,00), Max Risk (€ 0,00), % Down BEP (11.38%), % Up BEP (3.22%), and Days to Expires (92). Below this, a 'Positions' table lists various instruments including the DJ EURO STOXX 50 Index, DJ Euro Stoxx 50 03-18 Future, and several Call and Put options with their respective strikes and expiries.

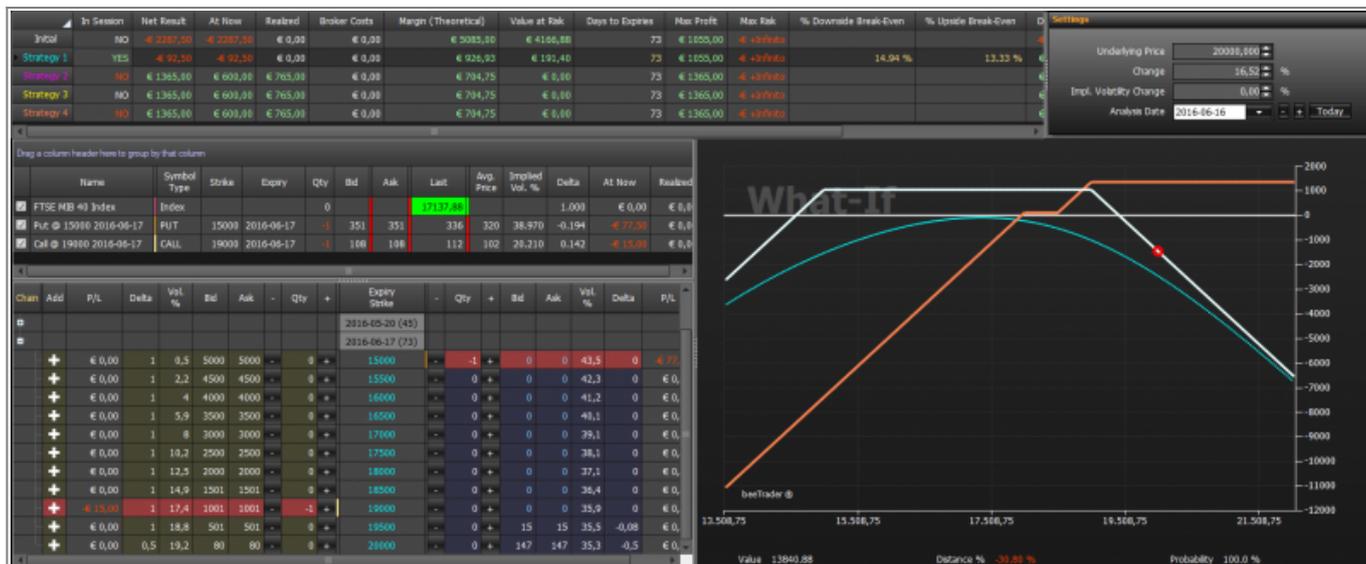

The 'Chart' table at the bottom left lists 18 different positions with columns for ROI %, BEP %, Time Value, National Exposure, P/L, Rho, Vega, Theta, Gamma, Delta, Vol. %, Avg. Price, Last, Qty, Expiry Date, and Bid/Ask prices. The 'What-If' chart on the right visualizes implied volatility surfaces for the DJ EURO STOXX 50 Index as of 2017-12-28 17:16:10, showing multiple curves in different colors representing various strategies. A 'Comparison Payoff Settings' dialog box is open, allowing users to select different strategies and chart colors for comparison.

5. In the upper section of the What-If the properties are displayed for all four possible changes. You can view them individually or simultaneously on the payoff simply by toggling the Strategy from the right mouse menu

Date	Notes	Underlying Price	Impl. Volatility Change %	Analysis Date	Asset Name	Quantity	Price	Realized	At Now	Implied Volatility	Delta	Gamma	Theta	Vega	Rho	TimeValue
2017-12-29 09:11:57	Esempio di correzione Strangle per manuale Iceberg	3674.97743	0	2018-03-15	Put @ 3500 2018-06-15	1	58.4	€ 1.032,00	€ 0,00	17.71	-0.276	0.001	-0.644	6.758	2.72	58.433

2017-12-29 09:11:57		3674.97743	0	2018-03-15	Put @ 3625 2018-06-15	-1	94.8	€ 0,00	€ 0,00	16.17	-0.416	0.001	-0.633	7.3	4.117	94.793

6. Once you decided the change of the strategy (we suppose the strategy 3, the yellow one) you have to click on "Apply" button, Now the change is saved and you can proceed with a new simulation step.

All changes made to the starting strategy are saved in **What-If History**, dove verrà creata una nuova sezione per ogni nuova sezione di What-If effettuata sulla strategia. \
 Andrea che vuol dire?
