

Iceberg Workspace

The “Workspace” is the set of open windows at once in Iceberg® with relative position. When you save a Workspace, strategies and portfolio opened in that moment are saved together.

The Workspace is saved automatically every 5 minutes, so if the user accidentally closes a strategy without saving by opening the Workspace has the ability to have the strategy in the last update. Now you can proceed to save the strategy, so that also the strategy saved outside of the Workspace is updated.
